

E18MCL

VERTICAL LIFT

The E18MCL features scissor steering for indoor or outdoor construction applications, machine weight of less than 2,000-lbs, familiar controls and more.

DESIGNED WITH THE OPERATOR IN MIND

- Platform control box commonality with scissors for increased familiarity
- Enhanced ease of entry and exit from platform, with coiled control cable to keep area tidy

GREATER DURABILITY

- Anodized aluminum mast with covers that reduce potential for debris to accumulate and hinder operation
- Simplified single cable and improved sheaves for optimized uptime

ENHANCED GROUND CONTROL PANEL

- Onboard Multi-Display Indicator provides real-time DTC codes and errors
- On-site troubleshooting with JLG Analyzer capability

EASE OF SERVICEABILITY

- Toolless access to key components
- Increased parts commonality with scissors

QUICK-CHANGE PLATFORMS

- Choose from 5 platform options to fit the job
- No tools necessary for changing

LIGHTWEIGHT & MANEUVERABLE

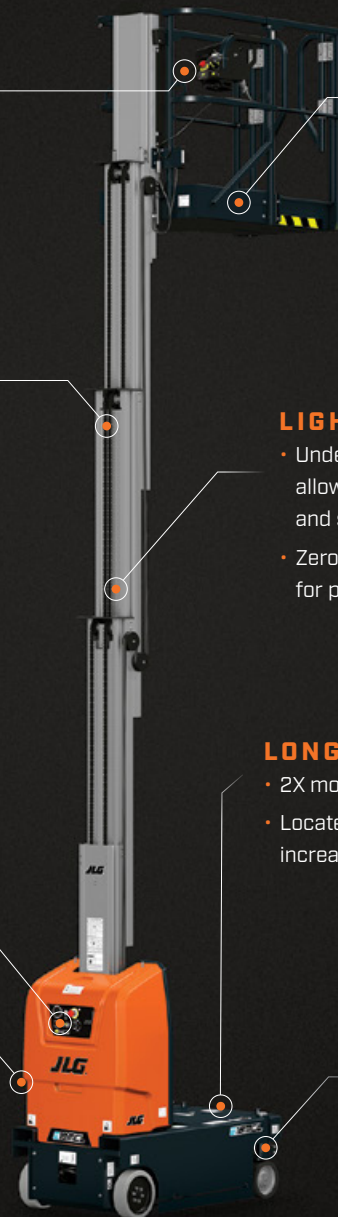

- Under 2,000-lb machine weight and 30-in width, allowing for use on a variety of job sites and sensitive surfaces
- Zero turning radius with electric drive motors for peak efficiency

LONGER-RUNNING BATTERIES

- 2X more duty cycles over the leading competitor
- Located in base of the machine for increased stability

SCISSOR STEERING

- Provides precise operation with increased control through tight spaces and doorways
- Features solid, non-marking tires for maximized traction on most types of flooring

NEW Series Models | E18MCL | E18MML
